Mobile Showcase

Our toolkit to touch and feel
There for your customers together

- /// Individual assortment
- /// Flexible locations
- /// Versatile marketing options

Deciding to purchase salon seating from a catalogue is hard to imagine for some of your customers.

Our mobile furniture showcase can help you out!

We can actively approach your customers together, from regional events to a visit on site. Creative services and intensive dialogue with customers are the keys to your success, and we want to accompany and support you in this regard.

We offer the real experience of sitting in and touching furniture with a small selection from our cushion assortment compressed into about 10 square metres. A total of 5 chair tops, 2 washing units, and 4 rolling stools are part of the basic assortment. The selection of models is a representative sampling of our product range and can be adjusted to fit your customer's wishes. The presentation can be expanded with a pavilion setup, in order to demonstrate the various pedestal options, washing units, and hairdressers chairs, for example.

Perhaps we can test out a model directly at the location it will be used in the future? You are invited to actively provide input for new ideas and make it part of your marketing campaign!

Customer service with high advertising benefits to increase your sales success!
